FRENCH horse armature

steel
14 h × 6½ w × 25 l in (36 × 17 × 63 cm)

Fully articulated armatures were used by artists in the 19th and early 20th century as a structure to apply clay for sculpture. By mid-century, highly crafted armatures such as this were replaced by flexible aluminum wire. Impressed mark to upright: [Made in France].

Estimate: \$6,000–8,000
